Ahrensburg, Germany, 10 March 2022

Implementing projects faster with online planning: The ESYLUX room parts list

With the room parts list, ESYLUX has integrated a new function into its website to support customers during the project planning process. In the list, users can create and name each of the rooms of a building and arrange the selected components for each room in a clear and simple way. Users can then download the list in various formats or immediately start a request for quotation.

Different types of room in offices, educational institutions and medical facilities generally require different automation and lighting solutions due to their functional or aesthetic requirements. The room parts list on the ESYLUX website allows customers to create lists for all of the floors and rooms of a building, providing a prospective overview.

Create clear and simple parts lists for projects

The room parts list is an online form that can be edited and expanded to include different buildings, floors and rooms. It can be accessed by clicking the icon in the website header. After entering project-specific information, users can add any number of rooms to the list and name them as required. The search function with autocomplete allows users to easily add the required components to each room in the quantity needed. Alternatively, users can directly add items from their watchlist to the room parts list.

Excel, PDF or request for quotation

Once the parts have been added, users have various options for downloading or using the room parts list. Users can save the room parts list on the website itself,

in case they want to edit or complete the list at a later date. When they visit the website again, they can access their saved room parts list by clicking the same icon as they clicked to create the list. Once the list is completed, users can download it as an MS Excel or PDF document. "This allows our customers to carry out the planning or ordering process in a simple and structured way, even for small projects", says Anne Spielberg, Head of International Marketing at ESYLUX.

The link to the room parts list is on the right-hand side of the homepage header. If users are also interested in receiving a quotation for their current selection, a link to the corresponding form can be found below the list.

About ESYLUX — performance for simplicity

ESYLUX develops, manufactures and distributes intelligent automation and lighting solutions that ensure better quality of life and energy efficiency in office buildings, educational institutions and health facilities. People's requirements and needs are central to the company's activities. ESYLUX places particular value on the simple application of its product solutions. ESYLUX customers and partners include wholesalers, installation companies, electrical and lighting planners and architects who trust in the company's 50 years of market experience and the personal, specialist advice provided by ESYLUX experts. Furthermore, ESYLUX meets the highest quality standards in research, development and production at its German site in Ahrensburg. The sales organisation is global: ESYLUX operates in collaboration with experienced trading partners and is represented by numerous subsidiaries in Europe, Asia and Oceania.
