THE SLP-2 PORTABLE SPOTLIGHT

ENERGY-EFFICIENT ILLUMINATION,
EASY TO USE,
FUNCTIONAL DESIGN

NEW!

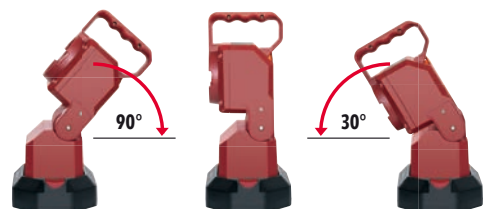

THE HANDLE

In contrast to other portable spotlights, the ergonomic handle **matches the direction of the light and movement of the holder**. This means it is always pointing in the right direction when carried.

The lamp head can be tilted **backwards by as much as 90°**, for example when being mounted directly to a wall, or **forwards by up to 30°** in order to direct the beam of light downwards.

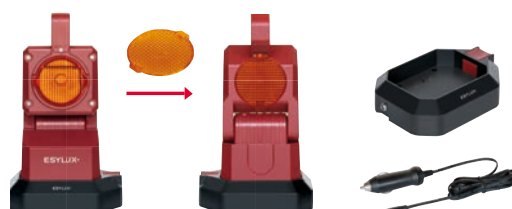

USE IN VEHICLES

The SLP-2 is also the perfect solution for vehicles and can be used as a hazard warning light after a breakdown:

The light is **splashproof (IP54)**, clicks into the charging cradle and **will not go out if vibrations occur**. The **orange diffusor disc** supplied is **stowed handily on the back** and can be placed over the reflector as necessary.

THE TECHNICAL FEATURES MEET MODERN-DAY REQUIREMENTS AND THE LIGHT IS EASY TO USE:

- Energy-efficient high-power LED from CREE (3 W/235 lm/6200 K)
- Powerful lithium-ion battery with charge level indicator (7.4 V/2200 mAh)
- Select the operating mode using the buttons underneath the handle:
0x: OFF | 1x: 4-hour work light | 2x: 8-hour continuous light | 3x: 8-hour flashing light | 4x: OFF
- Emergency light feature: In the event of a power failure, the light automatically starts with the last operating mode selected before the failure occurred (in charging cradle)

SLP-2 IS **ESY** BECAUSE HANDLE AND LIGHT ARE ALWAYS POINTING IN THE RIGHT DIRECTION!
